## 1. Activity of the Entreprise

In February 2023, the Annaba-based “Entreprise nationale de construction de matériels et équipements ferroviaires” (Ferrovial) won a contract to manufacture incinerators for special and hazardous waste from the holding company Algeria Chemical Specialties (ACS).

The Algerian group will initially manufacture a hazardous and special waste incineration plant for 3R-Santé, one of ACS's subsidiaries specializing in the management and treatment of hazardous waste. Other incineration plants will be manufactured and installed during subsequent phases of the project.

ACS manages a portfolio of four companies, including Entreprise nationale de verres et abrasif (Enava), Groupe industriel du papier et de la cellulose (Gipéc), Entreprise nationale de détergents et produits d'entretien (Enad) and Groupe industriel de plastiques et caoutchoucs (ENPC). For the record, a total of 32 companies are managed in Algeria by ACS.

### Points to be clarified:

- How far along is the ACS contract?
- What are Ferroviaire's references in waste incineration?

## 2. Product Range
