

The Zambian enterprise **Supamoto** offers Clean Cooking, with a 100% Zambia sustainable fuel branded SupaMoto®, and Stoves specifically designed for both Households and Businesses.

SupaMoto® pellets are made from waste sawdust from pine and eucalyptus sustainable plantations. The SupaMoto pellet factory has a capacity of 15,000 tonnes per year.

SupaMoto has offices in several Zambian cities: Solwezi, Mbala, Ndola, Monze, Chipata and Mongu.

SupaMoto has been selected as one of the 33 leading global enterprises to join the Clean Cooking Alliance Venture Catalyst program.

SupaMoto MAXI and MEDIUM fanned gasifying stoves are for commercial kitchens and institutional cooking. They are designed and made in Zambia. Very low carbon monoxide emissions, no soot emissions. Can be used with either a wall-plug or a solar charging system.
