High

1. Activity of the Enterprise

CITAL assembles the CITADIS tramway trainsets designed by Alstom. The tramway construction contracts signed by Alstom in Algeria were accompanied by the creation of CITAL, a joint venture in which Alstom holds a 49% stake, which has been assembling and maintaining the tramways since 2015, employing around 250 people.

Plant location: Annaba

Surface area: 5.2 ha

Built surface area: 11,871m²

The plant has a delivery capacity of 5 tramsets/month, with a stabilized production load in line with that of other Alstom units.

The production plant is equipped with all the assembly, test and trial facilities required for dynamic type and series testing.

The test center features a 1,000-meter track equipped with a state-of-the-art power supply system.
