Degree of accuracy of the information contained in the data sheet

Medium

1. Activity of the Entreprise

Created in September 2020, SEFT-AFRICA supports companies, local authorities and individuals in their activities through a range of services, including the construction of methanizers.

Points to be added:

- Turnover 2023?
- Number of biogas plants sold in 2023?
- Percentage of local value added?

2. Plant features: Poultry waste processing in Côte d'Ivoire

The photos show three methanizers designed and built locally by SEFT-AFRICA for the treatment and conversion of hen droppings into energy and bio-fertilizer.

Pre-treatment system for hen droppings installed by SEFT-AFRICA

Three methanizers, each with a capacity of 20m3

Device for storing filtered biogas in biogas tanks, produced locally by SEFT-AFRICA
