1. Activity of the enterprise

SE Wiring Systems Egypt S.A.E (SEWS-EG), a subsidiary of the Japanese Sumitomo Group, operates eight production sites in Egypt, including the Port Said sites (10th of Ramadan City, which began operations in 2009, and 6th of October City, which began operations in 2016).

The company has invested approximately \$100 million in its automotive component manufacturing facilities in Egypt, primarily high-performance braided cable harnesses. These companies export 100% of their production, mainly to Europe, for a value of approximately \$250 million.

The latest investment was inaugurated in May 2025. It is a new factory for the production of braided cables for the automotive industry, particularly for electric vehicles. It includes a training center and an R&D center. It is equipped with a solar energy production system. Investment: €22 million - Location: City of 10 Ramadan (Greater Cairo) - Area: 15 hectares - Direct jobs: 3,000 by the end of 2025 / indirect jobs: 12,000

2. Product Range

Braided cables for sliding doors

Braided cables for speed controllers

High-performance aluminum braided cables
