1. Company's sector of activity

Auxano is a private Nigerian company based in Lagos. It manufactures and assembles a wide range of mono and poly-crystalline solar panels.

The company operates a solar panel assembly plant in Nigeria.

In September 2020, Auxano Solar obtained \$1.5 million in financing from All On, an investment company backed by Shell, to develop its activities. This funding will enable Auxano Solar to increase the production capacity of its solar panel assembly plant by more than 50% over the next five years. It will also enable Auxano Solar to expand its services in Nigeria, including the sale and distribution of components such as hybrid inverters and charge controllers.

2. Products manufactured

Technical specifications of mono- and poly-crystalline solar panels :
