Degree of accuracy of the information contained in the data sheet

High

1. Overall profile

Since 1951, Penbro Kelnick has grown to be a leading supplier of specialized electrical equipment for the railways, telecommunications, utilities, mining and industrial market sectors.

All products are designed and manufactured inhouse in South Africa and tested for the African markets and the harsh African climate.

Through its major shareholder Telema (Italy) which owns 76%, Penbro Kelnick has a strong link into the overseas markets.

2. Products range

Power Resistors

Transformers & Magnetic Products

UPS and Standby Power

Metal Manufacturing

All enclosures for products like battery cabinets, control panels, inverters, power supplies, load banks, etc. are manufactured in a state-of-the-art metal manufacturing factory. The entire metal manufacturing section in the factory cutting and bending of steel and stainless steel up to 20 mm thickness with traditional punching machines and laser cutting, welding, painting and assembly. The design is made with modern CAD systems in 2D and 3D to ensure optimization of all parts and simulation of the final product at the early stage of the process.

Power Electronics

Design and manufacturing of various power electronics products, such as battery chargers, inverters, UPS, dc panels, changeover panels....

AC & DC Electrical Panels
