1. Activity of the enterprise

Eco-Gad is a service company specializing in the treatment and recovery of recyclable, non-recyclable and non-hazardous waste.

The company was founded in 2008.

This SME is the market leader in the collection and recovery of non-hazardous waste in Tunisia.

The waste collected is sent to treatment centers in Mghira and Sousse.

Selective sorting is carried out to separate waste by material, color and density.

After baling, the treated waste becomes a ready-to-use raw material.

EcoGad offers B2B solutions for shopping malls, industry, food processing, restaurants, hotels and government agencies.

In October 2024, Sotipapier, Tunisia's leading recycler of waste paper and cardboard, acquired a 70% stake in Eco-Gad.

Quantity of waste collected by Eco-Gad in 2020: 11099 tonnes
